Diseñando un Modelo de Seguridad

@ THE SPEED OF DEVOPS

Deploy and protect at
cloud scale and speed

across all clouds, assets
and networks

modern applications built
on micro services

Correlate cloud traffic,
users and workloads

01

**Network Security &
Threat Prevention**

02

**Security Posture
Management**

03

**Application
Security**

04

**Intelligence &
Threat hunting**

CLOUDGUARD

Secure your Cloud

+4000 customers
already use CloudGuard

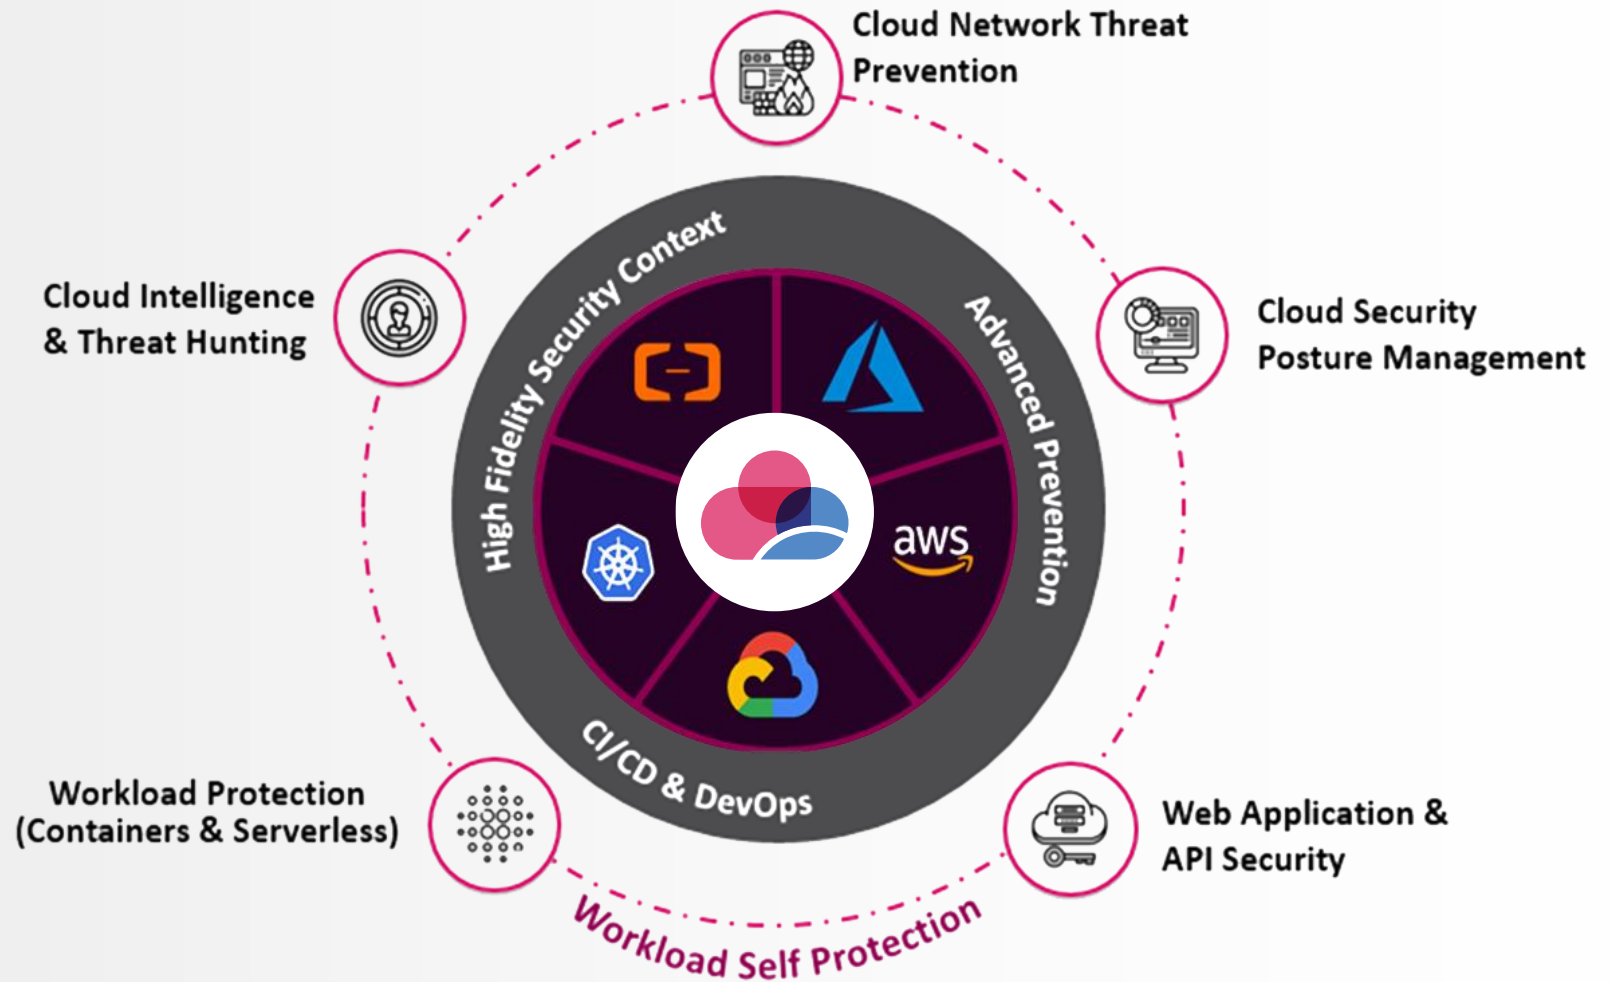

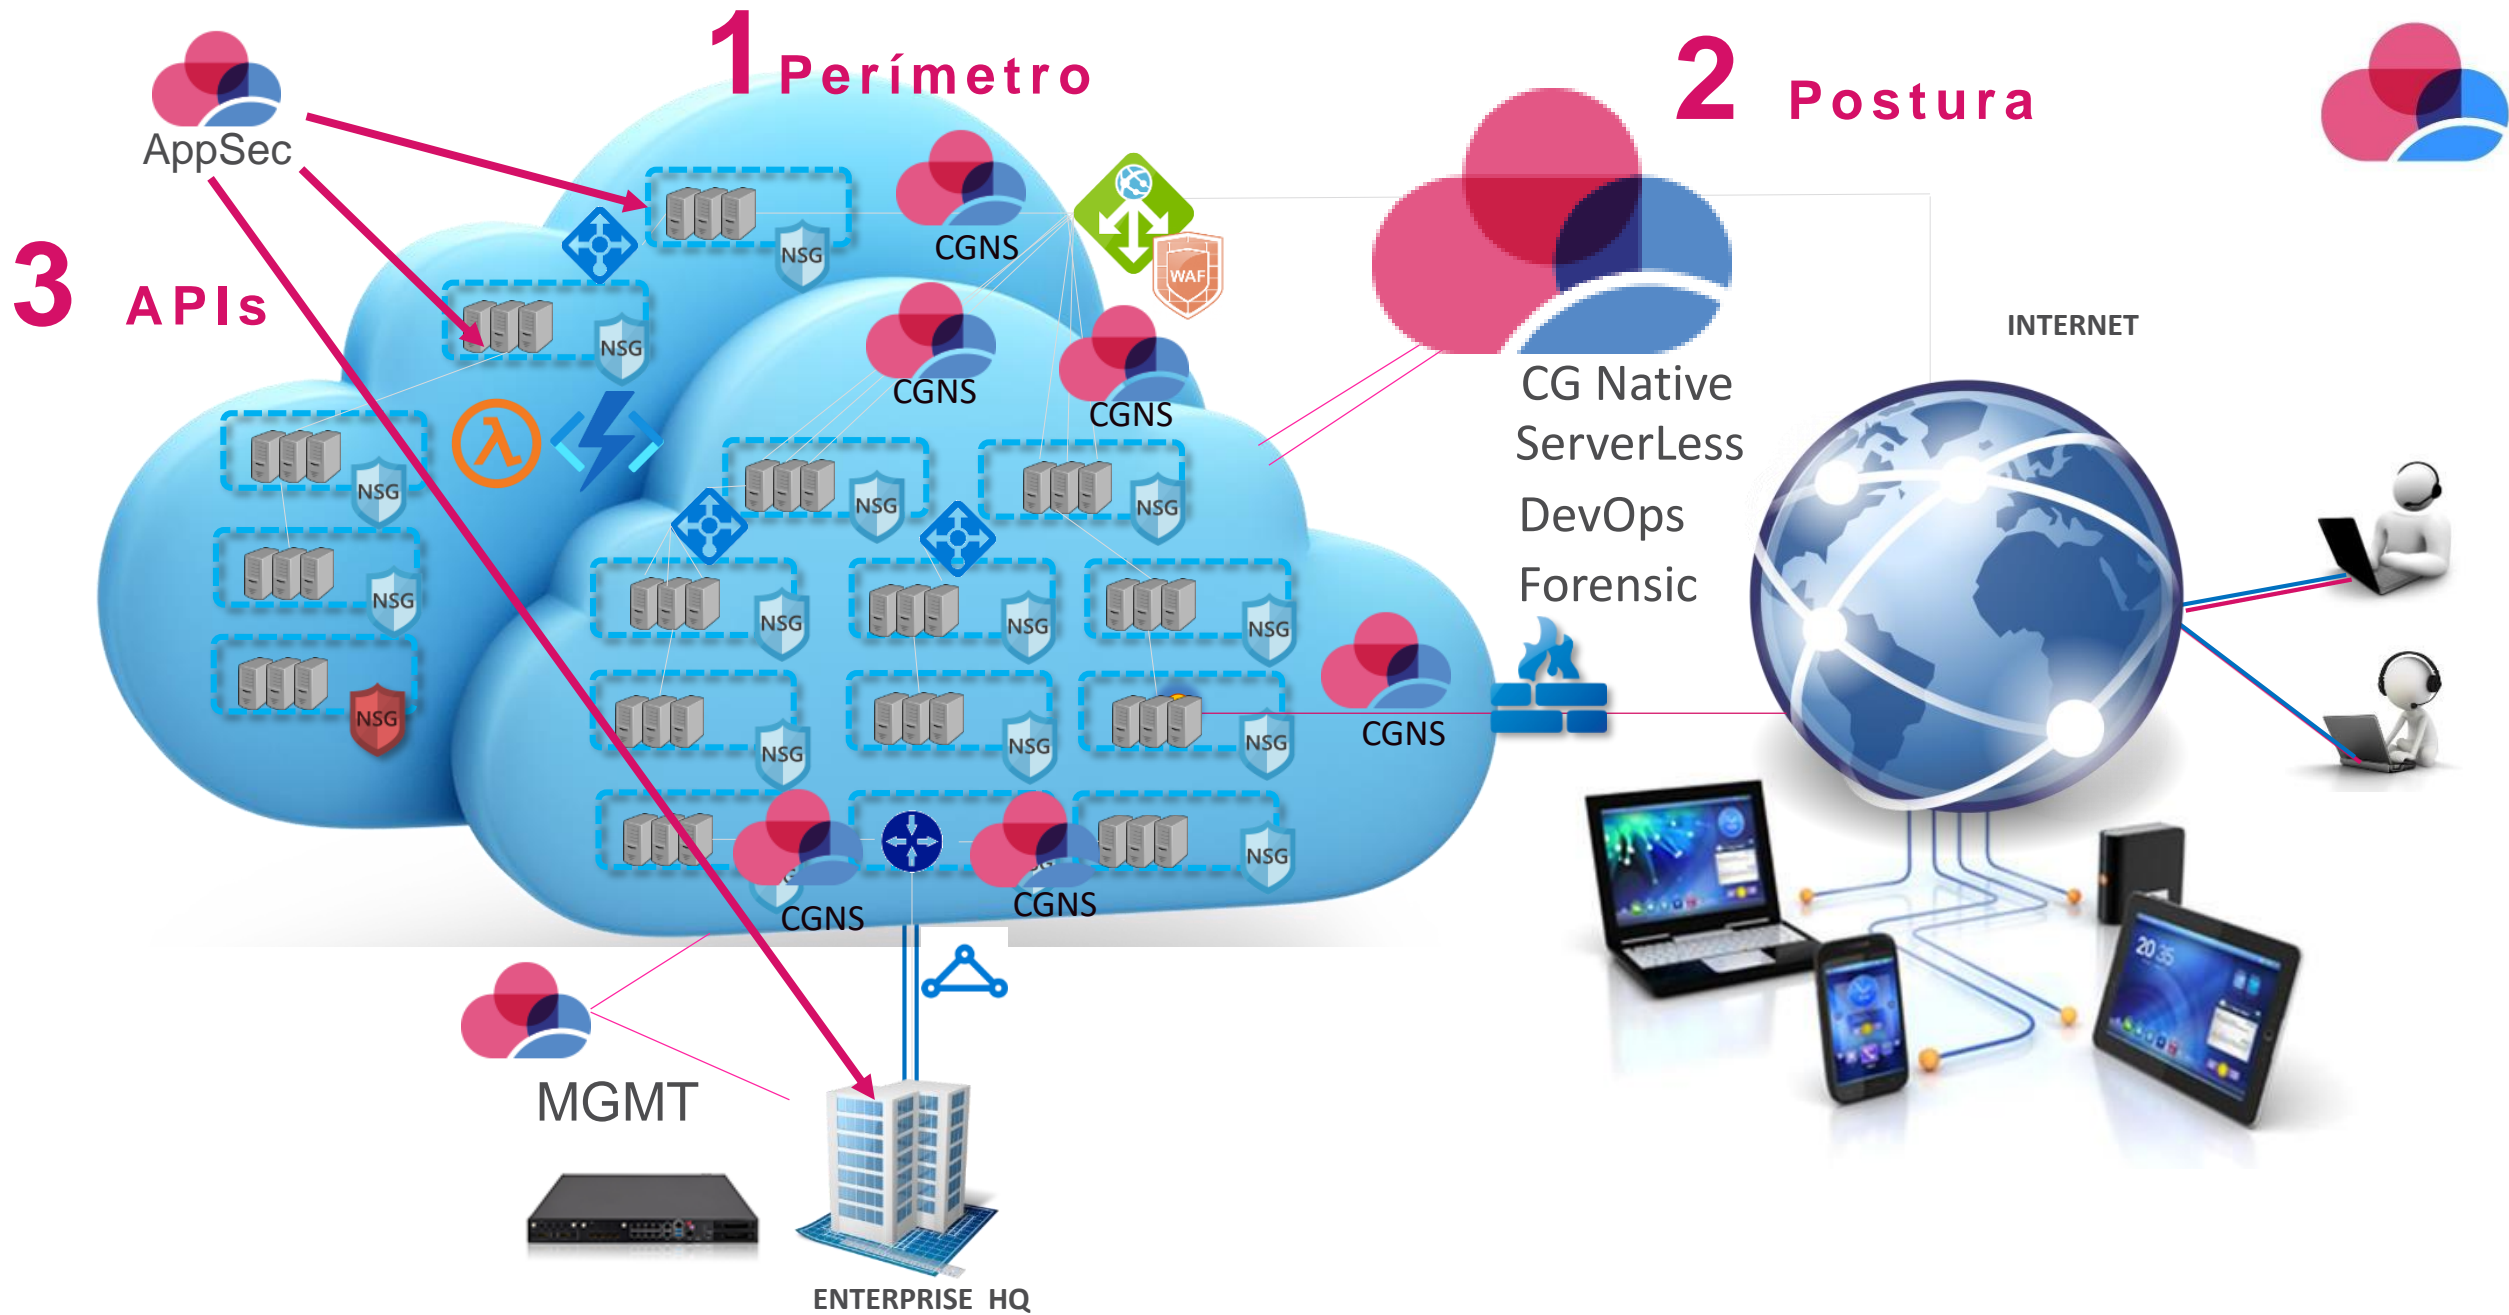

CloudGuard

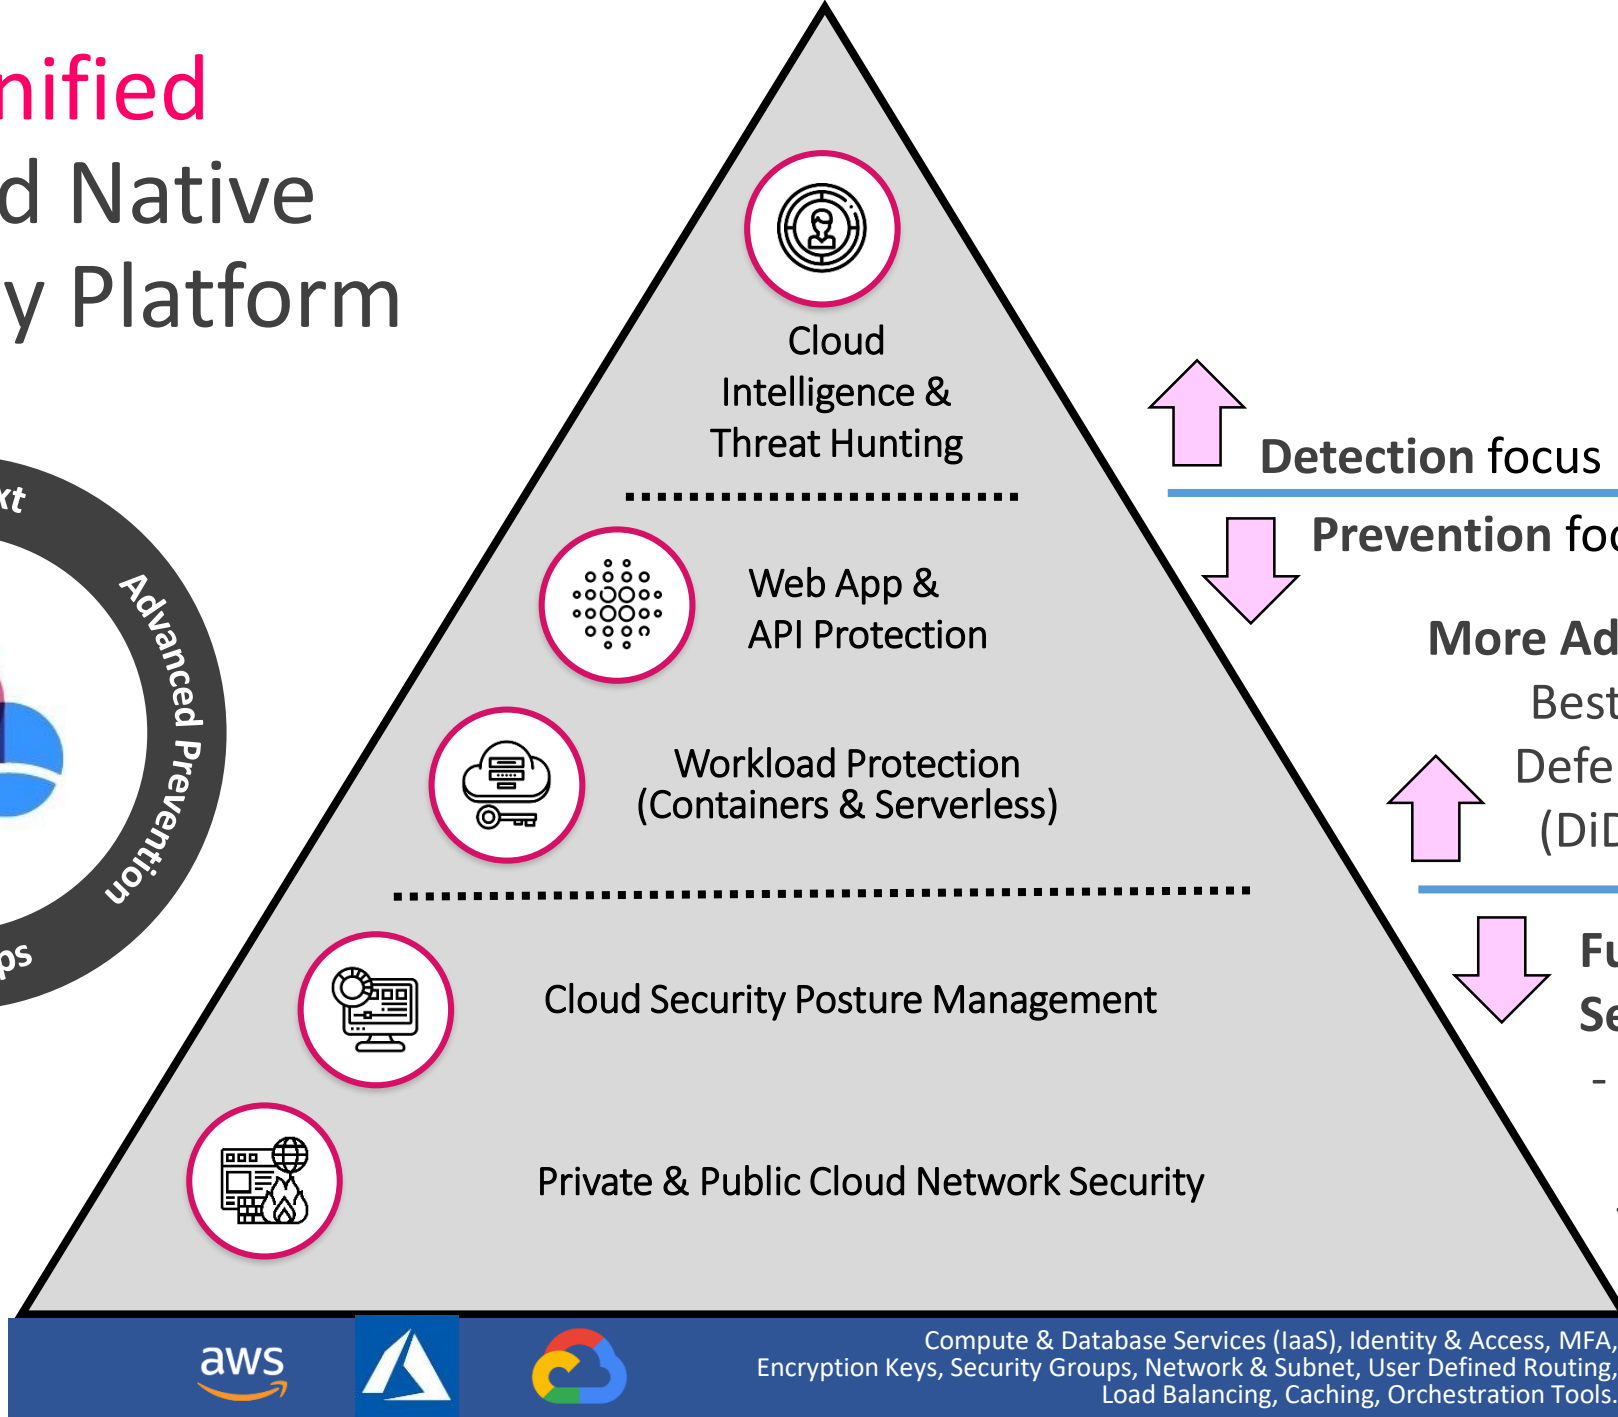

SECURE THE CLOUD

Secure the Cloud with a unified cloud native security platform

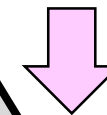

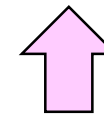

Unified Cloud Native Security Platform

↑ **Detection focus**

↓ **Prevention focus**

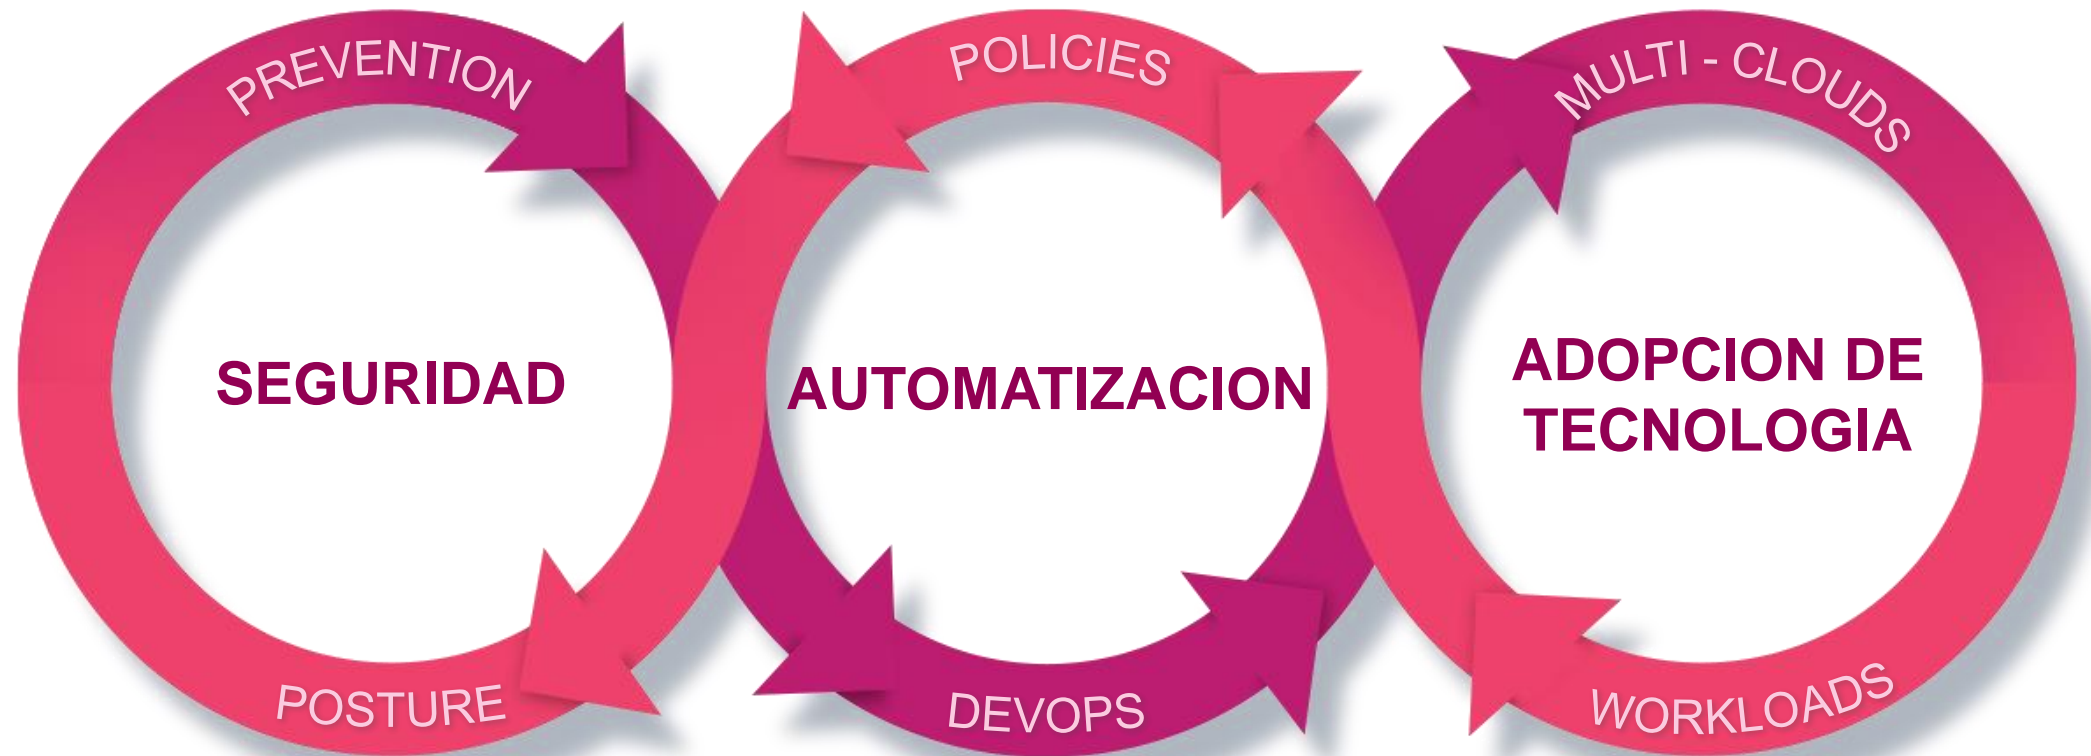

More Advanced Controls
Best Practice in
Defense In Depth
(DiD) approach

Fundamental Security Controls
- Broadest Risk Mitigation
- Greatest Cost Benefit

Compute & Database Services (IaaS), Identity & Access, MFA, Encryption Keys, Security Groups, Network & Subnet, User Defined Routing, Load Balancing, Caching, Orchestration Tools.

Seguridad de Nube@ A la velocidad de DevOps
