

# II Encuentro Latinoamericano y del Caribe de Investigadores de eCiencia

del 3 al 5 de septiembre de 2018  
Cartagena de Indias

Fabian Leotteau  
Presidente del Comité Científico

Comunidad de eCiencia + eArtes

## Introducción

¿Para qué sirve la ciencia?

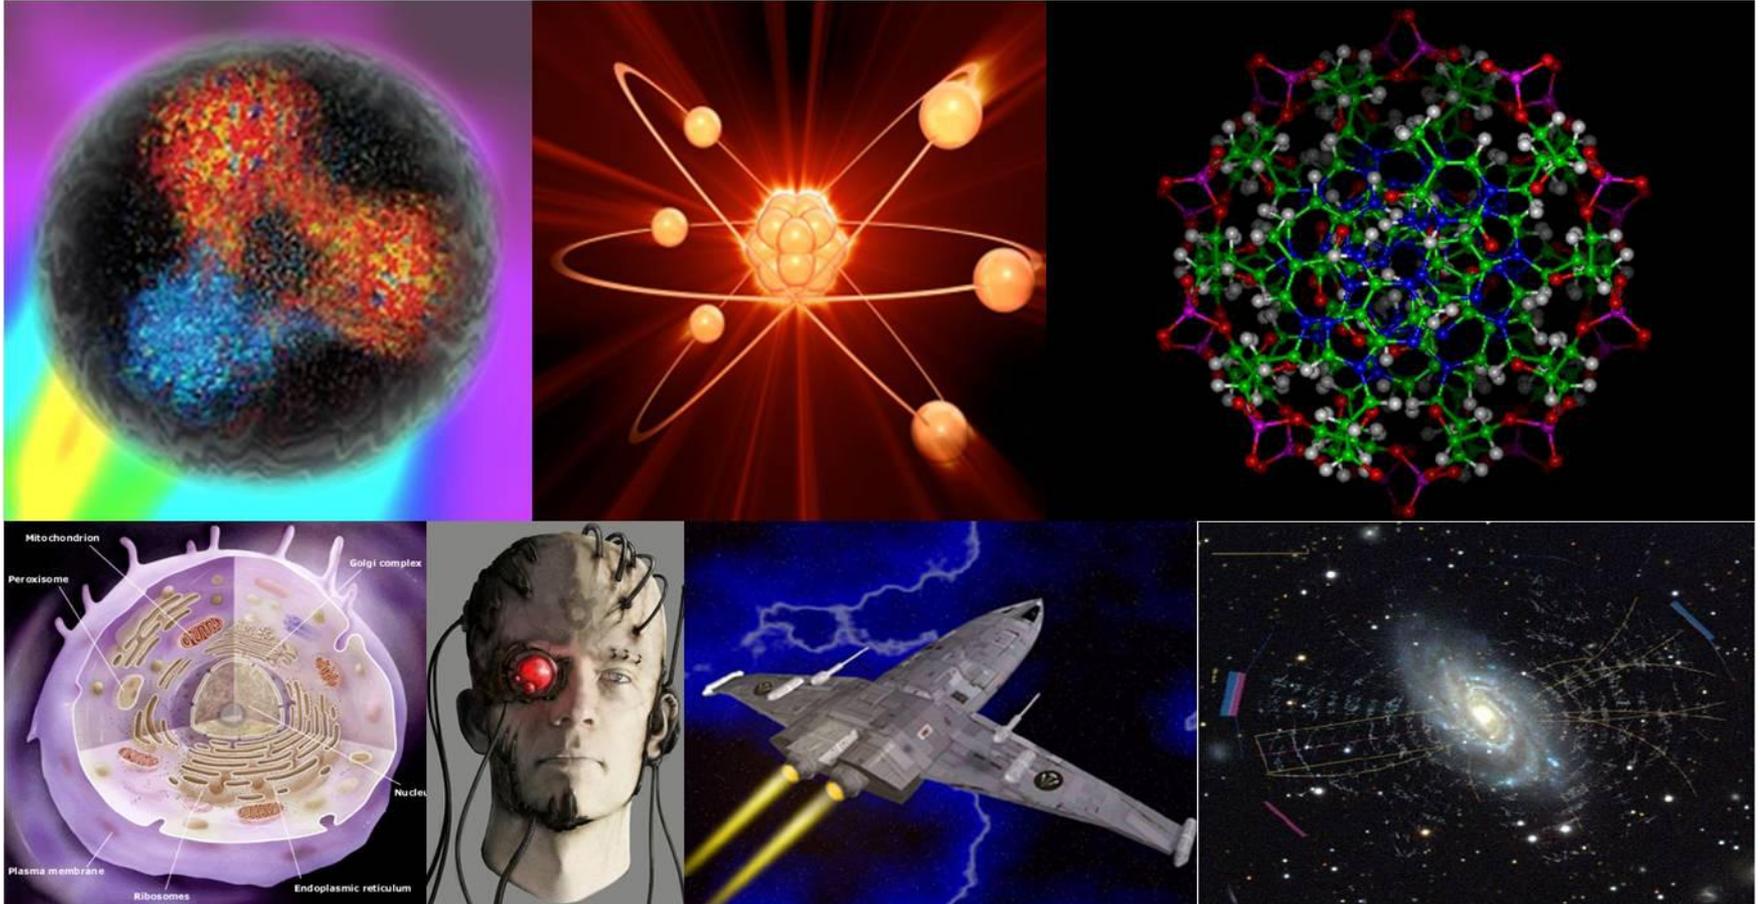

¿Para que reunir a los científicos de América Latina y el Caribe en el II Encuentro Latinoamericano de eCiencia?

**¿Por qué? Y ¿Para qué?**

**¿Qué es Ciencia?**

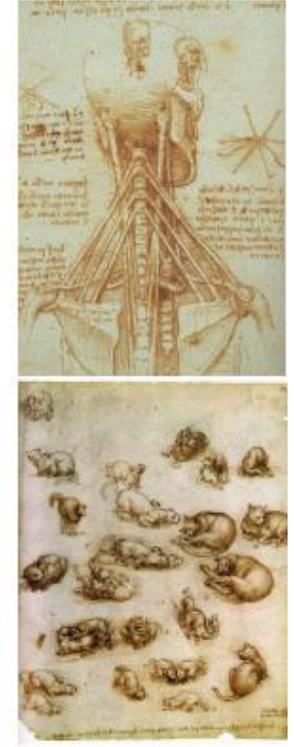

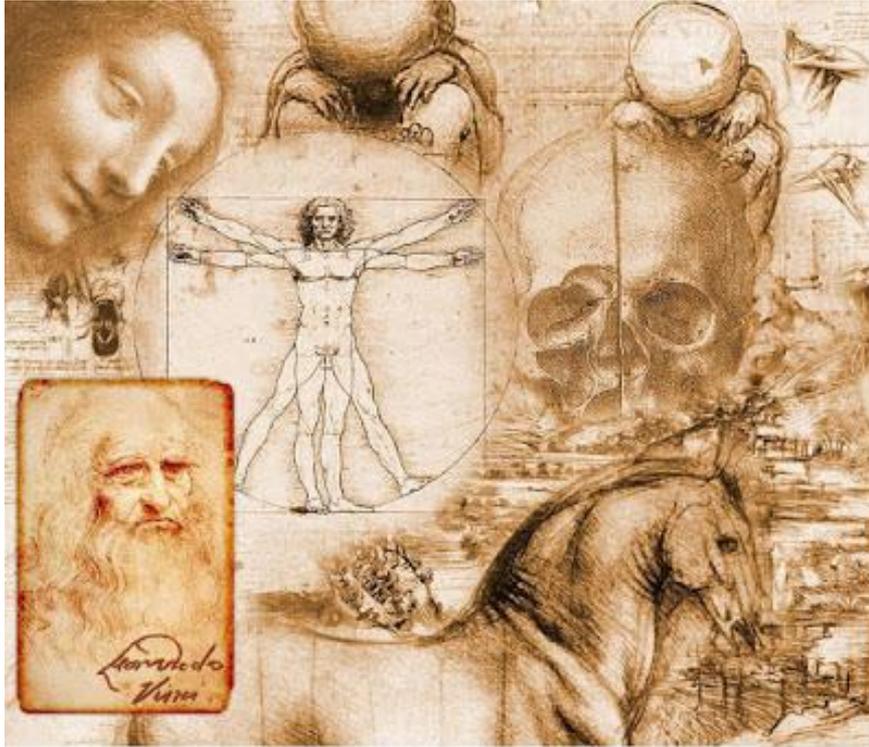

**¿Qué es Ciencia? Y ¿Para qué sirve la Ciencia?**

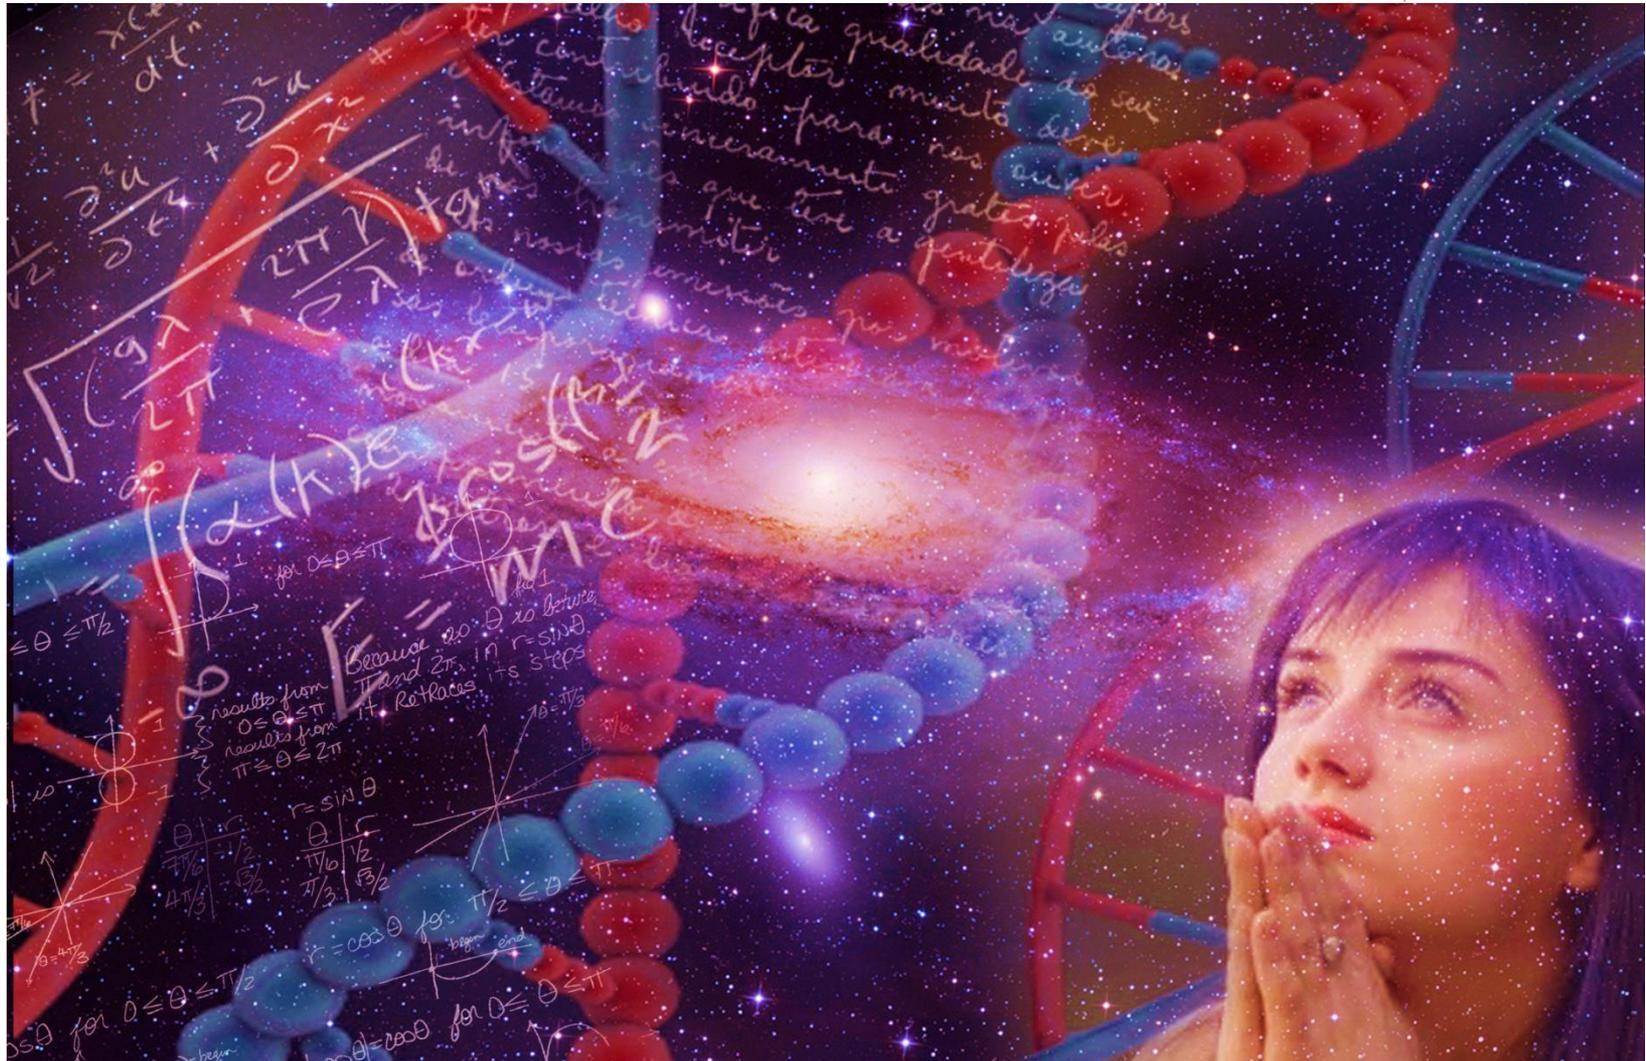

**¿Qué es un método científico?**

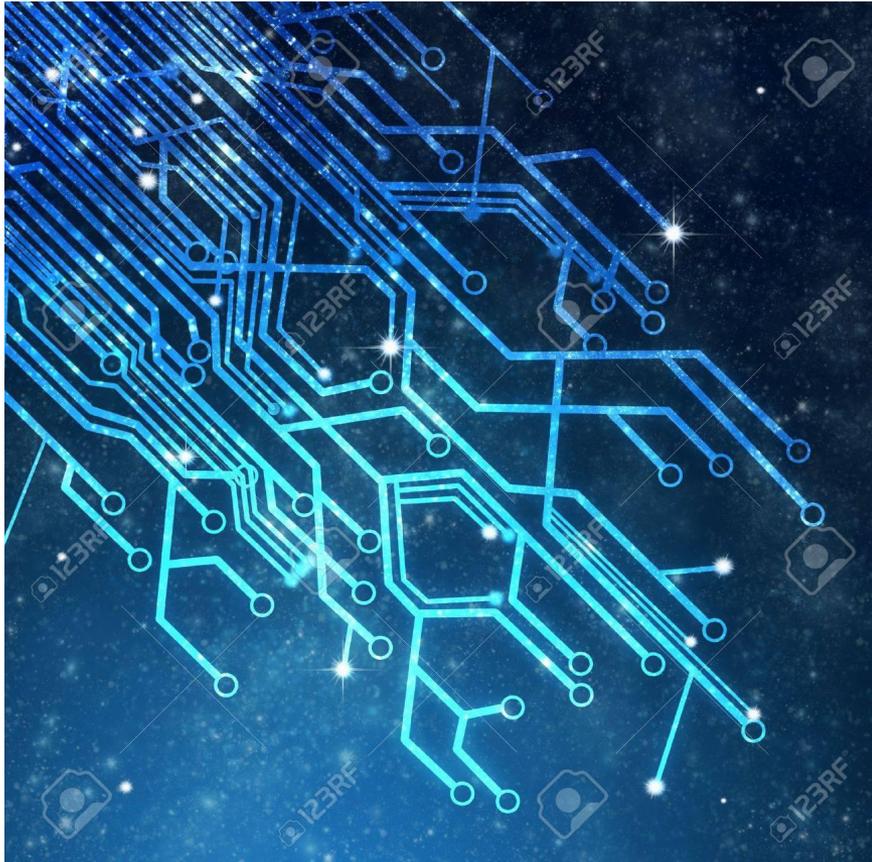

**¿Qué es un método científico?**

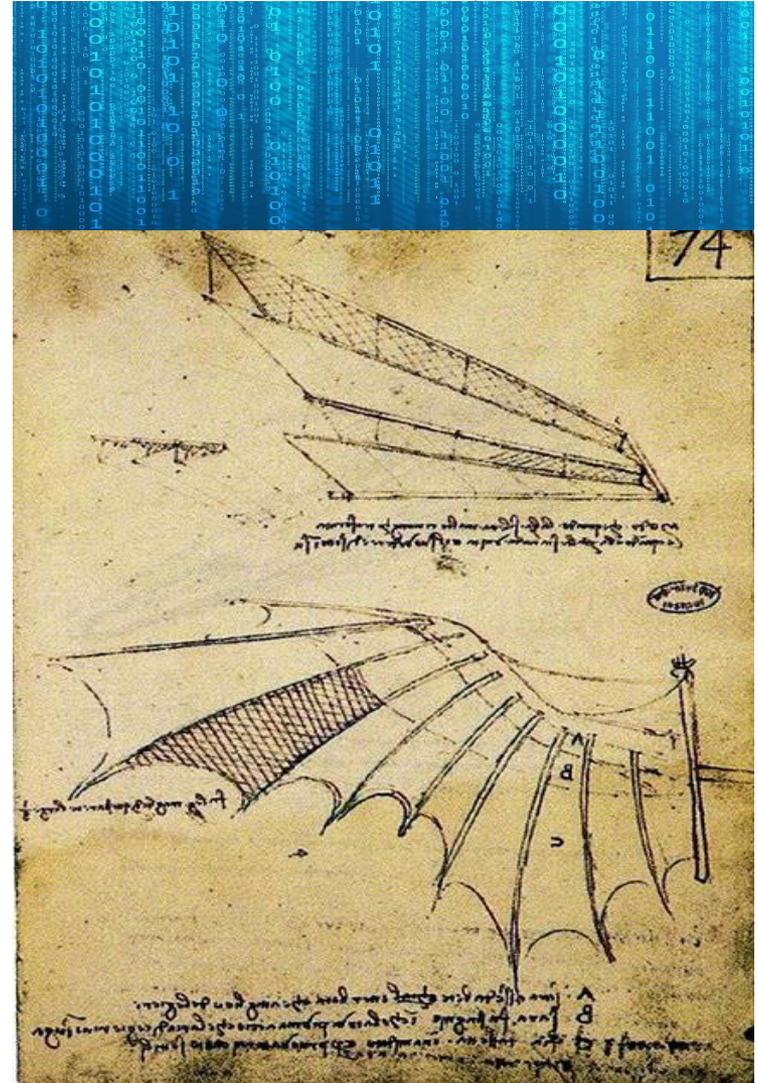

**¿Qué es el conocimiento científico?**

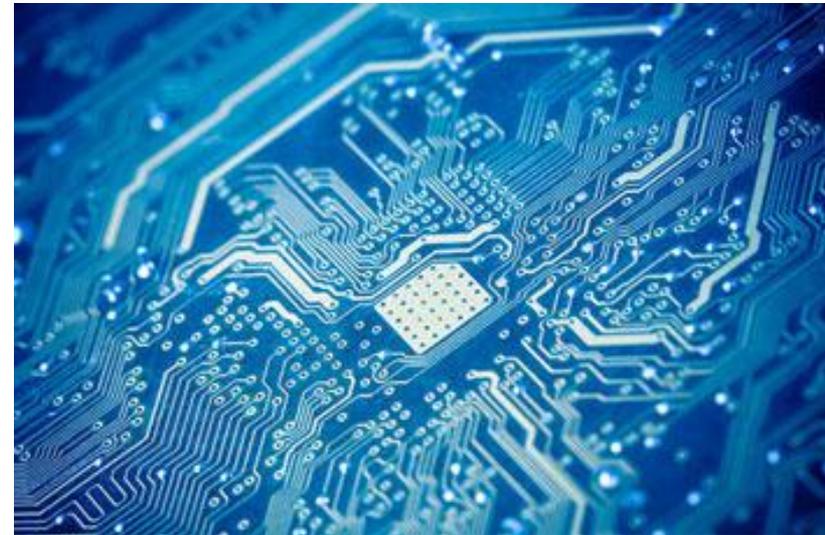

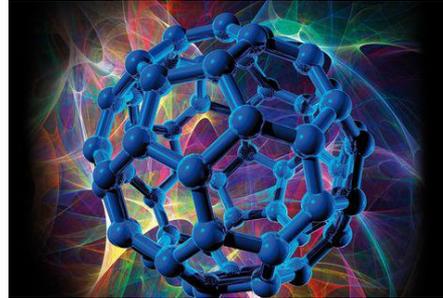

**¿Para qué nos sirve y qué podemos hacer con ese conocimiento?**

**¿Cuáles son los métodos para adquirir el conocimiento?**

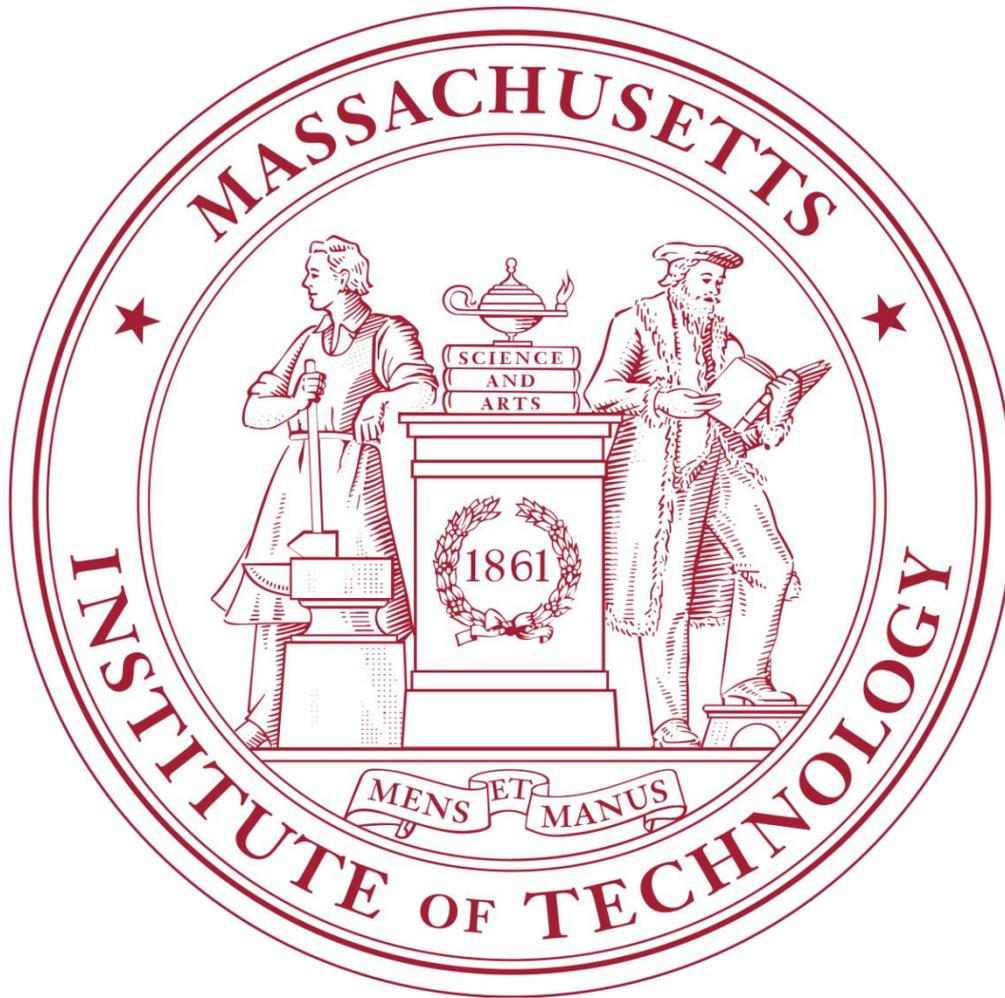

**Métodos y herramientas para extraer la información**

**Se hace indización con la información recolectada**

**¿Para que reunir a los científicos de América Latina y el Caribe en el II Encuentro de eCiencia?**

**Centros de Investigación a finales del siglo XIX y comienzo del XX**

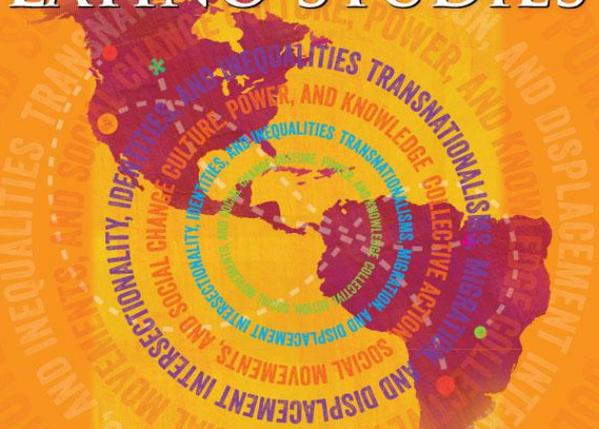

**‘El sentido de lo Humano’**

 UNIVERSITY OF CALIFORNIA SANTA CRUZ 1969-2025 THE ORIGINAL ADVANCEMENT ON CALIFORNIA UNIVERSITY

# DOCTORAL PROGRAM IN LATIN AMERICAN & LATINO STUDIES

**LALS** The Ph.D. program in Latin American and Latino Studies at the University of California, Santa Cruz, offers an innovative, transnational, and interdisciplinary approach to the study of the peoples, cultures, societies, and institutions of the Americas.

**CLRC** Founded in 1992, the Chicano Latino Research Center at the University of California, Santa Cruz, supports scholarship in the areas of Chicano, Latino, Latin American, and migration studies.

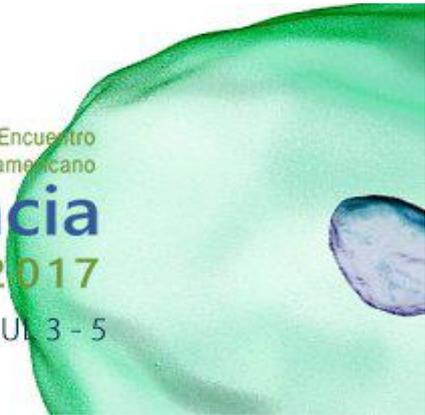

**STUDY & DESIGN YOUR PROJECTS AROUND OUR FOUR THEMES:**

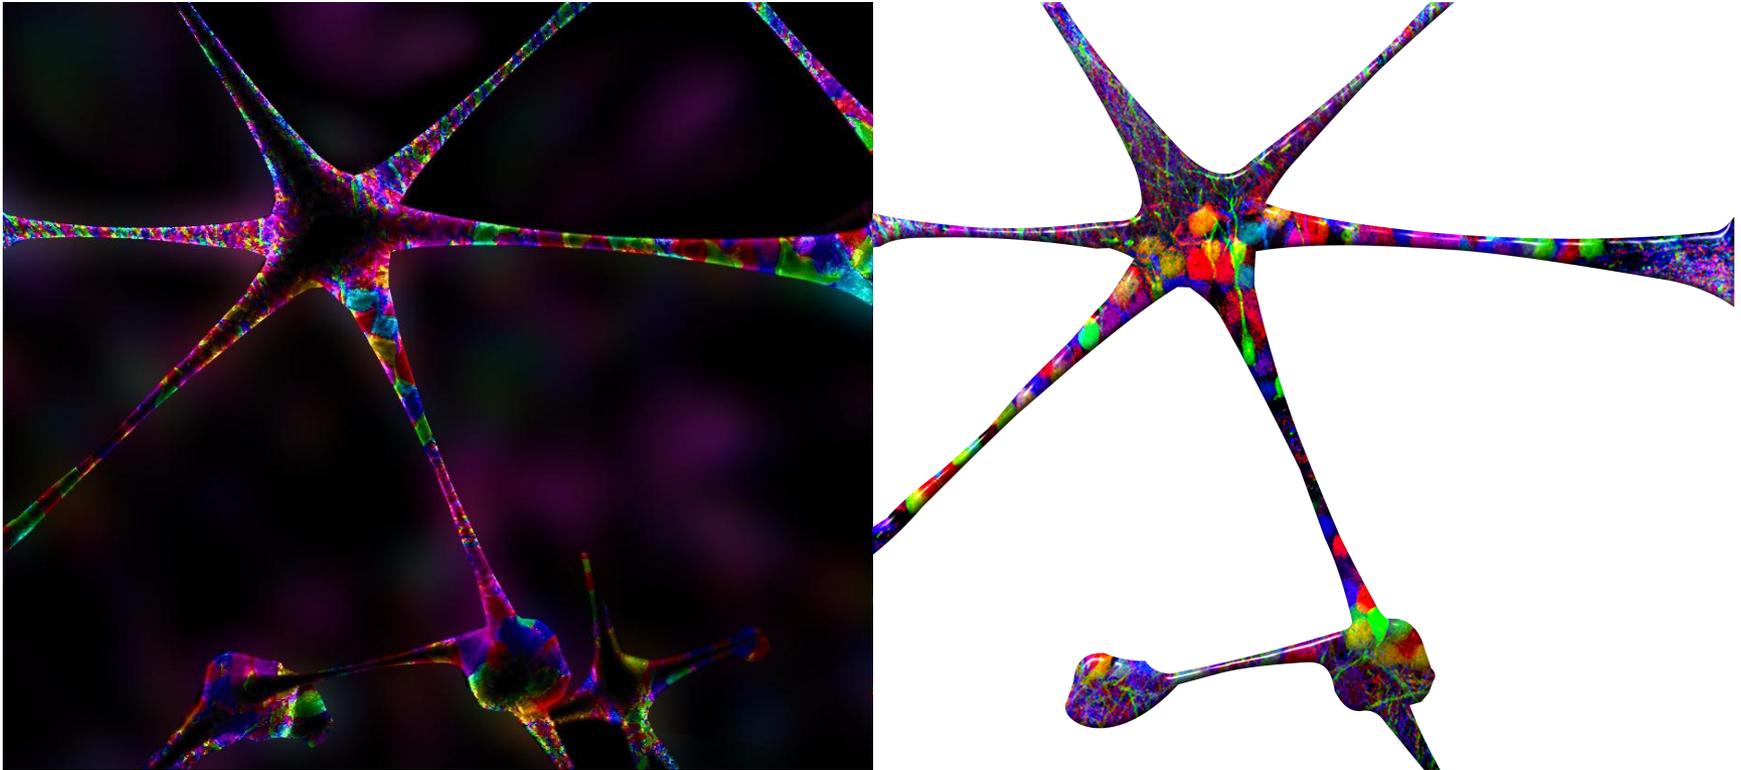

- 1 Transnationalisms, Migration, & Displacement**  
 Courses in this area illuminate the dynamic social cartographies of the Americas by focusing on cross-border demographic, cultural, social, economic, and political flows linking Latin American and Latino communities.
- 2 Intersectionality, Identities, & Inequalities**  
 This theme highlights the interconnected dimensions of identity categories, such as race, ethnicity, nationality, socioeconomic status, gender, sexuality, ability, and age, and the social structures that rely on and reproduce these categories and inequalities.
- 3 Collective Action, Social Movements, & Social Change**  
 Courses explore how communities come together to influence political, cultural, economic, and social structures and institutions, with a focus on grassroots activities, political/civic engagement, and social change projects at local, national, regional, and inter- and transnational levels.
- 4 Culture, Power, & Knowledge**  
 This theme emphasizes the analysis of contested symbols, meanings, aesthetics, and representations; interrogates relations of power, definitions of culture, markers of difference, and the construction of knowledge claims; and connects theoretical approaches to broader social, political, historical, and contemporary transformations.
